- **What went well**
 - The main features are tested carefully and bugs are fixed after being reported.

- A few more features were added.
- **What went wrong**
 - Some bugs took more time to fix than estimated.
 - The completion phase unexpectedly consumed more time and efforts as the team wanted the performance of the website to be at its best, which eventually led to the participation of all members.
- **Lessons learned**
 - The testing phase is actually one of the most difficult ones as it needs carefulness and the self-evaluation skill in order to realize which part is still lacking. As a result, the estimation time for the testing and fixing bugs should be extended to guarantee the performance of the product.
- **Jira plan:**
